Price Review

6 - 2 9 MONTH PRICE PROMISE Promotion

I/We acknowledge the Clarendon Homes' "9 Month Price Promise" has been explained to me/us, and I/we understand that this price lock takes effect from the date of initial deposit.

I/We understand and acknowledge that in return for paying my/our initial deposit, Clarendon Homes will hold the base price of the house, façade price, standard inclusions and promotional offer (if applicable), as set out in the Sales Estimate for 9 months in lieu of the standard 7 months, provided that I/we comply with the timeframes/milestones set out by Clarendon Homes as below:

· I/We must sign our Sales Estimate within 7 days of payment of initial deposit
· I/We must sign our Preliminary Building Agreement (and pay any/all additional deposit amounts required at this stage) within 7 days of presentation of the Preliminary Building Agreement
· I/We must sign our Building Agreement and HIA contract (and pay the balance of 5% deposit) within 7 days of presentation of the Building Agreement and HIA contract
· I/We provide evidence of ownership of title to our land and all “supporting documentation” (see note below) by no later than 6 months from deposit date.
· I/We must sign our selection documents including tile, electrical, Lifestyle studio selections, floor covering, air conditioning, data, robe fit out and security/window screens within 7 working days of the relative selection appointment.
· I/We achieve the Price Review Date (also referred to in the HIA contract as “Anticipated Start Date (ASD)” on or before 9 months from the date of initial deposit.

“Supporting documentation” includes:
o Satisfactory evidence of our title to the land
o Copy of the registered survey plan
o Copy of as-constructed drawings
o Full access to the land to conduct soil testing and contour surveys
o Copy of compaction report if applicable

Price Review Date requirements
1. Land registered and settled
2. All permits and approvals received
3. Finance approval received and funds ready to be released
4. Deposit paid
5. Demolition complete 3 weeks prior to the ASD
6. Tree removed and site clean
7. All specification, selection and construction documents signed

I/We understand and acknowledge that if we do not meet any of the above timeframes:

· If contract has been signed, Clarendon Homes will have the right to terminate and reprice.
· If contract is not yet signed, all items in the job will be reviewed and repriced automatically.

Site Costs

7 - 1	This Building Agreement is subject to a contour survey becoming available. • Note: Client acknowledges and accepts any additional costs associated with Earthworks, Services, and any unforseen site items once Contour Survey is received.	Note
7 - 2	This Preliminary Building Agreement is subject to a soil report becoming available. • Note: Client acknowledges and accepts any additional costs associated with Slab, Piering and any unforseen slab items once Soil Report is received. • Any additional costs will be adjusted by a variation in accordance with Clause 20 of the Contract.	Note
7 - 4	Earthworks: Provide an equal cut and fill to up to 1000mm fall across the block to achieve a level building platform. Note: Allows for up to 350m2 building PAD only.	$1,170
7 - 8	Provide for removal of spoil from KDR Site from drainage trenches due to Contaminated soils on Site.	$3,735
7 - 9	Client to remove any spoil/rubbish stockpiles from site prior to site start. If this is not done additional charges for Clarendon Homes to remove will be passed onto the client by means of a Post Contract Variation.	Note
7 - 10	Client to Clear/Slash existing vegetation from building site prior to site start. If this is not done additional charges for Clarendon Homes to remove will be passed onto the client by means of a Post Contract Variation.	Note
7 - 11	Note: Client is to provide entire site free of fire ants prior to site start. Should fire ants be detected prior to site start client is responsible to provide authorised inspection and eradiction control. Should fire ants be detected after site start any costs involved to provide inspection and removal shall be bourne by the client.	Note

Contact 1 Name: **Simon Jones** Contact 1 Signature: _____

Contact 2 Name: Contact 2 Signature: _____

Building Platform

8 - 5	Provide Additional Costs for access and handling for tradesmen and suppliers due to the nature of the block. Includes but not limited to: - Additional site cleans - Hand cleans - Manual handling for bricklayer - Tight site charges for Carpenter and Concreter - Cranage - Safety scaffolding to suit narrow block - Steep blocks that prevent storage or machine access - Nature strip hire due to lack or storage area - Power lines preventing cranage access - Limited access to the sides of the home preventing machine access - Split Deliveries due to limited access - Large Trees that create limited access	$5,000
8 - 6	Provide for the supply of Safety mesh to scaffolding sections of the roof edge to comply with WHS requirements.	$590
8 - 7	Provide for overhead barrier tape/bunting to existing power line.	$1,520
8 - 10	Provide for a zero lot to the Garage including - Roof edge protection for walls above 3.0m high. - Extend the slab rebate to suit zero lot. - Provide for a max 400mm high drop edge beam to the side of the Garage. - Provide for Non-Combustible downpipes as required. - Rockwool insulation between rafters on boundary wall. - Excludes Piering and additoinal scaffold requirements (to be charged for separately) -Note: Client is to arrange permission from the owner of neighbouring block for access for the builder. If this is not granted additional costs to the client will be incurred. -Note: Client to remove existing fence adjacent to Garage and reinstate after handover if applicable.	$2,850
8 - 11	Provide additional scaffold/ edge protection fee due to Zero boundary. NOTE: Required when Zero boundary wall is higher than 3.0m, has a parapet on boundary wall or retaining lower than platform on boundary)	$1,500
8 - 13	Trees to the front of the property are to be removed prior to site start. Client is to engage council and get approval to do this. • All site costs are subject to a satisfactory Builders site inspection prior to commencement of construction to ensure tree are removed. • If approval is not granted to remove the trees, No responsibility will be taken by the builder for damage or death of the tree. The client takes full responsibility for the trees to the front and any associated council matters. Trees will need to be trimmed back to suit access to build the house and will be at the builders discretion as to how much will need to be trimmed.	Note
8 - 14	Provide additional site investigations for KDRB including; - Surcharge for contour and detail survey with existing house. - One (1) additional contour survey after house has been removed. - One (1) additional Soil Test after house has been removed.	$2,943

Contact 1 Name: **Simon Jones** Contact 1 Signature: _____

Contact 2 Name: Contact 2 Signature: _____

8 - 15	Once house has been removed, the builder will conduct a second Survey and Soil test to determine if the removal of house has changed any site conditions. This Building agreement has been priced on the site survey and soil report available at the time prior to house removal. Costs associated with new information resulting from the second soil and survey report will be borne by client. • Note: Client acknowledges and accepts any additional costs associated with Earthworks, Services, Slab, Piering and any unforseen site items once second Contour Survey and second Soil Report are received.	Note
8 - 17	Provide 63amp three phase overhead power connection to a permanent timber property pole inside boundary, then underground electrical connection from property pole to meter box located on left/right side of Garage/Living/Study/Lounge. • Please note pricing has been based on the provision that the permanent property power pole can be installed prior to commencement of construction to reduce time delays for Energex power connection. • Any time delays for power connection which incur additional costs for generator hire to the Builder will be deducted from the Provisional Allowance in the Contract. • All weather access for a flat stable path 6m wide from kerb to proposed pole location, clear of any trees or obstruction, is required prior to install. If this is not provided, a return visit will be required and fees will be charged by way of variation. • Note: Three Phase power has not been found on site. Client to arrange with Energex, prior to a site start, to have three phase availability installed to the front boundary for future connection by Clarendon homes. ********** • NOTE: If an EV charger is included, allowances should be made for 80amp upgrade.	$4,090

Services

9 - 1	Stormwater drainage system has only been designed to cater for works by Clarendon Homes within proposed building platform as shown on site plan and does not consider any future works by owner after handover. Clarendon Homes does not take any responsibility for possible failure of system due to future works by owner.	Note
9 - 3	Provide field gully traps 5No as positioned on site plan.	$700
9 - 5	Provide costs for cut out and removal of concrete and installation of a Kerb adapter as required for the run of stormwater to the street.	$225
9 - 22	Clarendon Home will use their nominated Energy Connections Retailer to facilitate the connection of power in the customers' name for the duration of the build. This account is non-binding and the Customer can re select their preferred electrical retailer after construction is complete. It is the customers' responsibility to pay for all electricity consumed by the builder during the construction It is also the Customers' responsibility to pay for all mandatory metering/account establishment fees associated with power connection.	Note

Client Reminders

15 - 1	It is the clients responsibility to gain all relevant covenant approvals and ensure all covenant requirements are met.	Note
15 - 2	Client to provide retaining walls if necessary to site when requested by Clarendon Homes.	Note
15 - 3	Client to retain and stabilise all other cut & fill batters after Handover.	Note
15 - 4	Client to relocate trees with Local Authority vegetation protective services for driveway access.	Note
15 - 5	NOTE: The Client is to demolish and remove from site existing house and outbuildings, including footings and services above or below ground, paths, drive and fences etc prior to commencement of construction (Any separate council application to demolish the existing house is the clients responsibility, please check with your local council). • Demolition is to be completed a minimum of three weeks prior to the anticipated start date to allow for secondary reports, amended engineering and construction documentation to be completed. • Client to provide Clarendon Homes with Local Council Approval for house removal/demolition. Client to also provide Clarendon Homes Final Inspection Certificate after removal/demolition; • Client also agrees to provide Clarendon Homes a Hygienist Clearance Certificate certifying that there is no residual asbestos left on site after the demolition has been completed. • Clarendon Homes to provide additional site inspection after house removal/demolition to re-evaluate the site costs. Items that may be assessed are pad level, any additional compaction requirements, if any due to disturbance in soils and onsite drainage requirements; • Clients to cap off and identify all services above ground level after existing house removed and prior to the commencement of earthwork, Client acknowledges and accepts any additional costs associated with locating of the services connection points. • Following completion of demolition works, the Client must engage a suitably licensed plumber to inspect and certify the capping of the sewer connection. A Form 1 must be provided prior to site commencement. For the avoidance of doubt, a Form 4 will not be accepted as evidence of compliance for this purpose. All costs associated with obtaining the required certification shall be borne by the Client. Further information regarding these requirements is available on the Contractor's website. • Note: Client acknowledges and accepts any additional costs associated with additional earthworks, importing/exporting fill, any additional compaction requirements, removal of any additional material found on site, drainage issues, services issues and any other unforeseen site items during the site inspection and will included any unforeseen items found during course of construction.	Note
15 - 6	Client to provide Ident survey and have pegs reinstated prior to earthworks by Clarendon Homes.	Note

Contact 1 Name: **Simon Jones** Contact 1 Signature: _____

Contact 2 Name: Contact 2 Signature: _____

15 - 7	These specifications incorporate the QBCC Standards and Tolerances Guide. The client agrees that he/she has had access to review a copy of the Guide. The Guide can be accessed digitally at <https://www.qbcc.qld.gov.au/resources/guide/standards-tolerances-guide> The parties agree to use the QBCC Standards and Tolerances Guide as a point of reference for information on industry accepted workmanship standards and tolerances in deciding whether an alleged defect exists and/or whether the materials used and/or workmanship are in accordance with the plans and specifications. The QBCC Standards and Tolerances Guide will be used in priority to any other guide on standards and tolerances.	Note

Council fees - BCC

16 - 1	Provide council fees for Brisbane City Council.	Note
16 - 2	Provide Council Fees for New Driveway Crossover as per Brisbane City Council.	$550
16 - 3	Provide Brisbane Council additional fees for FIRST setback relaxation. This contract is subject to Local Authority approval for relaxation being granted. Note: Client to obtain neighbour's written consent.	$1,450

Energy Efficiency

24 - 1 7 STAR ENERGY EFFICIENCY — Note

With our focus on smarter, more sustainable living, you can enjoy a home that's not only comfortable but also cost-effective for years to come.

The following upgrades to your home have been included to contribute to energy efficiency compliance. .

• Anticon insulation/ sarking
• Whirly birds (x2) and Eave snap vents
• Ceiling fans as required
• R2.0 batts with sisalation to all external walls
• Additional ceiling R3.5 batts
• R3.5 batts to floors above Alfresco/ Porch
• R2.0 batts to the internal Garage wall
• Planibel G 'Low E' clear glazing to all windows and sgd's except wet ares. (Applies to ALL Double Storey homes and acreage Single Storey homes only)

Due to the nature of the NCC 2022 updates, the necessary requirements (and associated costs) to achieve compliance may vary significantly based on your chosen home design, the siting of your home on your block of land and your chosen colours. Clarendon Homes have based the current assessment on a medium colour scheme and the above provisions. For these reasons, Clarendon Homes can only determine the final requirements and costs to achieve compliance once you have completed all design and colour selections. Requirements are subject to final colours and electrical selections.

Any additional upgrades required to achieve energy efficiency compliance will be an additional cost to this contract, bourne by the owner/s.

24 - 2 Provide an Energy Efficiency upgrades allowance. — $3,000

Due to the nature of the NCC 2022 updates, the necessary requirements (and associated costs) to achieve compliance may vary significantly based on your chosen home design, the siting of your home on your block of land and your chosen colours. As a result, modifications to your floorplan or additional inclusion upgrades (or both) to achieve 7 star compliance may be required.

The unused portion of the Energy Efficiency Allowance will be credited once:
• All relevant council, covenant, and certifier approvals have been issued to the builder.
• All final selections have been completed and signed off by the owners.
• A final NatHERS assessment has been completed before construction commencement and confirms compliance.

NOTE: Any additional changes required to achieve a building approval that are not included in the current specification and building agreement will be amended by variation per Clauses 11 and 20 of the Contract, with all associated costs being included in the final price to the owners.

Council notes

29 - 1 Tender subject to the final private certifiers preliminary assessment. (Any additional costs for council requirements or services if any to be Borne by Client.) — Note
• If no allowances have been made for Bushfire, Acoustic or Flood requirements, and become known at time of pre-assesment, any additional costs relating to the above assessment will be an additional cost to this contract, borne by the Client.

TERMS & CONDITIONS

Clarendon Homes' display homes exhibit items that are not part of our standard inclusion specification. These include, but are not limited to: light fittings, down lights, audio systems, home theatre systems, internal feature walls, ducted air conditioning, window furnishings, timber shutters, security system, flyscreens, door closers, feature wall tiles, internal furniture, carpet, floor tiling, intercom systems, external décor items and works (ie: pergolas, landscaping, timber decking, paving, water features), upgrades to feature materials, bricks, render finishes, ceiling heights, roof pitches, cabinetry, shelving, tapware, kitchen appliances, sanitary ware, laminates, doors, door furniture, natural/composite stone, wall colours, wall finishes and laundry cabinetry.

Clarendon Homes reserves the right to choose the specification, materials and supplier where there is a dispute that may arise in relation to the standard inclusion specification. Clarendon Homes reserves the right to change specifications, materials and suppliers without notice provided that the materials or specifications are of a similar finish and standard.

Variations to Clarendon Homes' standard designs may affect the energy efficiency rating of the home. Any additional costs for items requiring upgrades to the energy efficiency rating arising from variations to the standard design will be passed onto the client in all circumstances.

Clarendon Homes' standard inclusion specification is based on the Traditional façade with face brick finish. Upgraded specifications and materials may be included in the price of façade options.

Rock and/or any unforeseen materials or objects found below the surface of the landowner's property will be at the landowner's cost for the excavation and removal from the property if it has an effect on the construction of the home or building area.

Further condition apply. Please refer to a Clarendon Homes consultant for more information.
